[DEF CON 27, Recon Village – Mitchell Parker’s ‘Building OSINT And Recon Program To Address Healthcare’](#)

**Healthcare adopted technology early...**

- And could not get out from under their decisions
- You have a significant amount of legacy applications and data underpinning the business
- My favorite examples: Pagers and faxes are still used despite the evident risks due to high replacement cost
- Departments and business units want to remain fiercely independent
  - Or in the case of some universities, centralization costs more money than doing it yourself and running your own Shadow IT department
  - At least one health system has admitted paying for ransomware because departments didn't pay for central backup
